

From **November 22** this year until **December 22** this year at the Faculty of Environmental Engineering, changes are introduced in the form of some classes.

In addition to the classes so far carried out in a remote - synchronous form, some courses listed below were added to this form.

Each classes to be implemented remotely will have a virtual classroom assigned to education (the change process is underway).

Courses not listed below (with the number of the actual room left in the Edukacja CL system) will be still held in a full-time form.

Field of study: EQM, second degree, full-time studies:

Semester 1: Transfer to the remote form of the following classes:

- 1) Water supply system (lecture, p)
- 2) Water quality management (lecture)
- 3) Water treatment technology (lecture)
- 4) Autocad (I)
- 5) Raw materials management (lecture, s)
- 6) Sanitary biology (lecture)
- 7) Ethics of new and emerging (lecture)
- 8) Strategic management (lecture)

As a result of the changes, on Mondays and Tuesdays, classes will be carried out remotely.

Semester 3: Transfer to the remote form of the following classes:

- 1) Renewable energy (lecture)
- 2) Organization of construction works (lecture)
- 3) Building regulation (lecture)
- 4) Diploma seminar (s)

As a result of changes on Fridays, classes will be carried out remotely.
